

Daimler India Commercial Vehicles Pvt. Ltd.

About Daimler India Commercial Vehicles

Daimler India Commercial Vehicles (DICV) is a 100% subsidiary of Daimler AG, Stuttgart, Germany. It currently produces and sells a range of 9 to 49 ton trucks for the Indian market, as BharatBenz, and FUSO trucks for exports to markets in South East Asia, Africa, the Middle East and Latin America.

Under its bus division, the company will produce and sell BharatBenz buses and Mercedes-Benz buses for the Indian market and produce chassis for exports.

“With DICV and our BharatBenz brand we aim at nothing less than revolutionise the Indian Commercial Vehicle market. And we are well on track to do so.”

- Erich Nesselhauf
Managing Director and CEO
Daimler India Commercial Vehicles

Manufacturing Facility

DICV's state-of-the-art manufacturing facility at Oragadam, near Chennai houses its truck and bus plant.

It is the only Daimler Trucks plant worldwide to produce commercial vehicles, engines and spares for three brands - Mercedes-Benz, BharatBenz and FUSO, under one roof. The facility spreads over 400 acres and is equipped with modern robotics technology, R&D Centre, an integrated training facility apart from its in-house supplier park. In line with its focus on green energy, the plant also uses solar power from its part logistics warehouse to reduce dependency on conventional power.

Oragadam, Chennai, India
