Mitsubishi Fuso launches a newly designed LED rear combination lamp for Super Great

- Newly designed LED rear combination lamp is now available as an optional setting for the Super Great
- The eye-catching design provides better visibility for other drivers, supporting road safety

Kawasaki, Japan - Mitsubishi Fuso Truck and Bus Corporation (MFTBC; headquarters: Kawasaki City, Kanagawa Prefecture; President and CEO: Karl Deppen), is pleased to announce that it will add a newly designed LED rear combination lamp to the heavy-duty Super Great truck. The new Super Great model equipped with the new LED rear combination lamp will be available through MFTBC sales companies and regional sales units across Japan starting from May 2022.

The new LED rear combination lamp comes in a more consolidated design that combines the functions of five lamps into one. The new design integrates seamlessly into the vehicle body with its streamlined shape. The optimized brightness and shape of the lamp supports superior visibility and recognition for other drivers, contributing to consistent safety on the road. Smooth maneuvering is further supported with bright reverse lights. The brake lights are also activated independently of the rest of the tail lamp design.

The newly added LED rear combination lamp comes in two variations, the large "Type L" and smaller "Type S" (small size), and is available as an optional setting. The design will also be rolled out in foreign markets such as Australia, New Zealand, Singapore, Hong Kong, and Taiwan in the future.

* The new LED rear combination lamp is an optional setting from the manufacturer and is available for fitting on the Pro line and Premium line Super Great models.

* Mixer and semi-tractor models are set to "Type S", while cargo, dump, full tractor, and construction models are set to "Type L".

* For the price of these LED rear combination lamps, please contact your nearest Mitsubishi Fuso regional sales unit.

MFTBC at a Glance

Based in Kawasaki, Japan, Mitsubishi Fuso Truck and Bus Corporation (MFTBC) is one of Asia's leading commercial vehicle manufacturers, with 89.29% of its shares owned by Daimler Truck AG and 10.71% by various Mitsubishi group companies. An icon in the Japanese commercial vehicle industry with a longstanding history of 90 years with its FUSO brand, MFTBC manufactures a range of commercial vehicles including light, medium, and heavy-duty trucks and buses, and industrial engines for over 170 markets worldwide. In 2017, MFTBC introduced the eCanter, the first all-electric light-duty truck in series-production and in 2019, the Super Great – Japan's first heavy-duty truck fitted with Level 2 Automated Driving Support Technology, a benchmark in the Japanese commercial vehicle market. MFTBC operates under the umbrella of Daimler Truck Asia, together with its partner organization Daimler India Commercial Vehicles (DICV) in India. This strategic unit allows the entities to collaborate on areas such as product development, parts sourcing and production to provide the best value to customers.
